6. Explanation of footnotes and comments

- (1) Refer to the following pages for approved commercial products and oil change intervals.
- (2) For information on oil and filter change intervals for trucks used in long-haul and delivery traffic (EcoLife variants with the final letters T, TK, TP, TKP), please refer to the List of Lubricants TE-ML 20.
- (3) Oil and filter change required, depending on what occurs first. Use only ZF original filter elements. In the case that the initial reoiling from an ATF [automatic transmission fluid] of the lubricant class 25B to an ATF with extended oil change intervals is planned, then an interim oil change after <20,000 km / <1,000 h / one year at the most is required.
- (4) The lubricant class 25C also contains several NATO code H-548 synthetic ATFs (automatic transmission fluids). NATO code H-548 oils that are not listed in this lubricant class are not permissible.
- (5) When reoiling from a lubricant class 25A oil to a lubricant class 25B, 25C, 25F or 25G ATF [automatic transmission fluid], a one-time interim oil change is required after < 10,000 km / one year at the most.
- (6) Oil and filter change required, depending on what occurs first. Use only ZF original filter elements. In the case that the initial reoiling from an ATF [automatic transmission fluid] of the lubricant class 25B or 25C to an ATF with extended oil change intervals is planned, then an interim oil change after <1,000 h / one year at the most is required.
- (7) Oil and filter change required, depending on what occurs first. Use only ZF original filter elements.

Additives of any kind added **later** to the oil change the oil in a manner that is unpredictable, and they are therefore not permitted. No liability of any kind will be accepted by ZF for any damage resulting from the use of such additives.
